EDUCATION

West Virginia State University **Institute, WV**
B.S. in Computer Science | GPA: 3.6/4.0 Expected Graduation Date: May 2027
Honors: Break Through Tech AI Fellow, Dean's List (2023-2026), WVSU Citizenship Award
Coursework: AI Engineering, Databases, Computer Networks, Operating Systems, Data Structures & Algorithms

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, C++, C, SQL, Bash, HTML/CSS
Frameworks: React, FastAPI, Express, Flask, Playwright, pytest, PyTorch
Tools/Technologies: Git, Docker, Linux, Node.js, PostgreSQL, MySQL, MongoDB, REST APIs, CI/CD

WORK EXPERIENCE

F5 | *Software Engineer Intern* Boston, MA, May – Aug 2026
- Engineered an agentic AI pipeline using LLMs to transform a PRD into 60+ test cases across 10 QA categories
- Designed an evaluation harness comparing AI-generated plans against human-written references, achieving ~80% alignment
- Developed 9 automated E2E tests using Playwright and pytest, validating bot classification across 3 authentication states via API and UI
- Eliminated stale-data false positives via baseline-delta checks and adaptive polling, cutting runtime by 26%

WVSU Research and Development Center | *AI/ML Research Assistant* Institute, WV, May – Aug 2025
- Benchmarked CNN, LSTM + BERT-based phishing detection models using PyTorch, evaluating accuracy, precision, recall and F1-score
- Analyzed 20 research studies to identify effective transfer learning approaches for phishing detection in domain-specific email datasets

Cornell Lab of Ornithology | *Data Analyst* Ithaca, NY, Oct 2023 – Apr 2025
- Validated 1,000+ bird observations using eBird's spatial-temporal filtering tools, maintaining a reversal rate under 2%
- Authored regional filter rules for 12 frequently misidentified species, reducing downstream flagged submissions

TRIO Student Support Services | *Tutor* Institute, WV, Feb 2024 – Present
- Tutored 50+ students in Computer Science and Mathematics, with 85% improving by at least one letter grade
- Built a Python script tracking session attendance and topic frequency, informing two new group workshops

PROJECTS

Arbiter | Python, scikit-learn, Claude API Aug 2026 – Present
- Built a cost-aware multi-agent moderation system evaluated on 8K comments, escalating ambiguous cases to LLM debate
- Engineered competitive and collaborative debate pipelines with 2 adversarial agents + judge across 4 moderation strategies
- Implemented structured LLM outputs, quote verification, retries, and failure isolation to handle hallucinations and API failures

Campus Climb | Flask, PostgreSQL, Ollama Feb – Aug 2025
- Built a Flask + PostgreSQL app centralizing 300+ opportunity listings from 4 sources, refreshed nightly via a scheduled scraper
- Implemented an Ollama (Llama 3.1 8B) filtering pipeline reaching 88% precision on 200 manually labeled posts
- Served 50 users in the first month, with 60% returning within two weeks based on session analytics

Phish Guardian | Node.js, Express, VirusTotal API, MongoDB Jan – Aug 2026
- Built a phishing-detection service in Node.js/Express integrating the VirusTotal API, processing 50+ URL and email scans
- Designed 9 REST endpoints with JWT/bcrypt authentication over MongoDB schemas for users, scan history, and cached verdicts
- Achieved 80% detection accuracy on a labeled set of 100 phishing and benign URLs from PhishTank and Tranco

LEADERSHIP

Black Enterprise Smart HBCU Hackathon | *Team Leader* Institute, WV, Aug 2024
- Led a 5-member team to design a working prototype in 24 hours, coordinating tasks across frontend, backend, and pitch preparation

International Student Association | *Secretary* Institute, WV, Aug 2024 – Aug 2025
- Organized events for 30+ students, improving engagement through outreach and event logistics
